

**ALL OUR ADDITIVES GUARANTEE HIGH DISPERSION AND
NO DUST. WE DEVELOP TAILOR MADE FORMULATIONS**

PRODUCT RANGE pag.1

FLAME RETARDANT MASTERBATCHES

- **MB PE DETO 31**

It's a 80% active flame retardant masterbatch, carried on high MFI LDPE. Flame retardant package is a really active combination of brominate FR and antimony trioxide as synergist.

- **MB PE CPO 31**

It's a 60% active flame retardant masterbatch, carried on high MFI LDPE. Flame retardant package is a combination of chlorinated paraffin FR and antimony trioxide as synergist.

- **GC HF 41 CE**

HALOGEN FREE SOLUTION

NEW

It's a 90% active halogen free flame retardant, carried on PE WAX. Flame retardant package is a combination of P1 base flame retardant with its antimony free synergist.

- **MB PE BDDP 50**

It's a 50% active flame retardant masterbatch, carried on high MFI LDPE. It Contains an aliphatic-aromatic brominate flame retardant, antimony free.

- **MB PE BATO 31**

It's a 60% active flame retardant masterbatch, carried on high MFI LDPE. Flame retardant package is a really active combination of easy melting and highly thermal stable brominate FR and antimony trioxide as synergist.

- **GC HF 1000 CE**

HALOGEN FREE SOLUTION

NEW

It's a 90% active halogen free flame retardant, carried on PE WAX. Flame retardant package is a combination of P/N base flame retardant with its antimony free synergist. It works with intumescent mechanism.

TALC AND ENDOTHERMIC NUCLEATING MASTERBATCHES

- **STARCELL PO 60**
- **STARCELL PO 60 U**

60% active masterbatch, carried in high MFI LDPE, of talc with particle size: d50 2-4 µm. We can offer laminar and very active spherical talc (U version)

- **STARCELL PO 70**
- **STARCELL PO 70 U**

70% active masterbatch, carried in high MFI LDPE, of talc with particle size: d50 2-4 µm. we can offer laminar and very active spherical talc (U version).

- **MB PO HYDRO NUC 35**

35% active masterbatch, carried in high MFI LDPE, of chemical endothermic blowing agent mixture.

- **MB PO HYDRO NUC 35T**

45% active masterbatch, carried in high MFI LDPE, of chemical and physical endothermic blowing agent mixture.

**ALL OUR ADDITIVES GUARANTEE HIGH DISPERSION AND
NO DUST. WE DEVELOP TAILOR MADE FORMULATIONS**

PRODUCT RANGE pag.2

PROCESSING AID AND ANTISTATIC

- **GC DGM 95** Glycerol mono stearate tri-substituted, 95% pure, in pellets
- **GC GMS 90** Glycerol mono stearate tri-substituted, 90% pure, in micro-pearls or in powder form
- **GC GMS 40** Glycerol mono stearate mono-substituted, 40% pure, in flakes.
- **STARAID EV G 30** EVA/PE carried 30% active GMS 40 masterbatch
- **STARAID PE OL 20** EVA/PE carried 20% active OLEAMIDE masterbatch

PEROXIDES

- **GC DICUMYL PEROXIDE** 98% pure dicumyl peroxide in flakes
- **GC C DCP 40** 40% active compacted pellets of dicumyl peroxide, supported by calcium carbonate and silica.
- **GC BIPB 40** 40% active compacted pellets of di-(tertbutyl peroxyisopropyl) benzene, mainly known as bis-peroxide, supported by calcium carbonate and silica.

We can offer a full range of peroxides, pure or in diluted compacted form

COLOR MASTERBATCHES

We can offer a full range of color masterbatches, carried on GPPS and PETG.
