

## GC DGM 95

### Distilled Glycerol Monostearate

**GC DGM 95** is widely used in food, cosmetics and plastics. **GC DGM 95** can be used in the plastic sector as an anti-static, anti-fog or lubricant. **GC DGM 95** is a good emulsifier, dispersant, stabilizer and an anti-aging starch.

#### PHYSICAL-CHEMICAL PROPERTIES

Appearance	Pastilles
Colour	White
Assay, %	Min 95.0
Free Acid (Stearic acid), %	Max 2.5
Melting Point, °C	65.0 ± 5.0
Iodine value, g I <sub>2</sub> /100 g	Max 1.0
Arsenic (As), %	Max 0.0001
Lead (Pb), %	Max 0.0005

**HANDLING AND STORAGE:** The processing and use of GC DGM 95 requires adequate technical and professional knowledge. Please consult safety data sheet for further handling, storage and toxicity information. GC DGM 95 has to be stored in tightly sealed original container in a cool and well-ventilated area, away from direct sunlight.

**PACKAGING:** Standard packaging size of GC DGM 95 is in 25 Kg bags.

**IMPORTANT NOTE** Some plastic additives, fillers or pigments can have a significant influence on the properties of the end product. Before using this product, please be informed. Machine stop at high temperature could create degradation of polymers. Please clean with neutral polymers.

#### DISCLAIMER:

Information contained in this document is provided to the best of our knowledge and is considered true as per revision date. We do not accept any liability for loss and damage that may occur from the improper use of this information and for the use against the safety legal requirements and patent rights. This specification does not release the customer from the obligation to check the product as to its suitability for intended area of usage.
