

GC K ACE 60M

GC K ACE 60M is potassium acetate in ethylene glycol solution mainly used as a trimerized catalyst for polyurethanes. **GC K ACE 60M** is odorless, reduces reaction time and promotes the 'final cure' process in PUR foams. **GC K ACE 60M** is soluble in water, alcohol and other polar solvents.

CHEMICAL-PHYSICAL PROPERTIES

Appearance	Liquid
Color	Light yellow
Potassium Acetate Content, %	38 ± 2
Viscosity @ 25°C, mPa s	300-500
Acid number, mgKOH/g (calculated)	1090

HANDLING AND STORAGE:

The use of GC K ACE 60M requires technical and professional knowledge. For further information on handling, storage and toxicity consult the safety data sheet. GC K ACE 60M is hygroscopic and must always be stored sealed, in a cool, ventilated and protected from atmospheric agents.

PACKAGING:

The standard packaging of GC K ACE 60M is in 1000 kg IBCs.

DISCLAIMER:

The information shown here, originating from a series of our own and others' research, is to be considered fully reliable, however, we cannot assume any responsibility regarding the use of the information provided here.

No guarantees can and will not be given as to the results that may arise from their application and the products mentioned are sold on the condition that the buyer tests their suitability for its particular uses.
