

MB PE CPO 31

HALOGENATED FR MASTERBATCH

MB PE CPO 31 is a paraffin wax based masterbatch in a PE matrix, halogenated and synergized.
MB PE CPO 31 is a viable solution for flame retardant formulations in a wide range of applications.
MB PE CPO 31 is used in formulations for elastomers, wires and cables, textile covers and office machines. **MB PE CPO 31** is particularly effective in polyolefins, styrenics and ETP.

PHYSICO-CHEMICAL PROPERTIES

Appearance	White granules
Additives content, %	70±2
Density @ 25°C, g/cm ³	2.00-2.80
Humidity, %	Max 0.25

HANDLING AND STORAGE: The processing and use of MB PE CPO 31 requires adequate technical and professional knowledge. Please consult safety data sheet for further handling, storage and toxicity information.
MB PE CPO 31 has to be stored in tightly sealed original container in a cool and well-ventilated area, away from direct sunlight.

PACKAGING: Standard packaging size of MB PE CPO 31 is 25 Kg bag.

IMPORTANT NOTE: Some plastic additives, fillers or pigments can significantly influence the flame retardant properties of the end product. Before using this product, please be informed.
Machine stop at high temperature could create degradation of polymers. Please clean with neutral polymers.
