

MB PET DETO 31

HALOGENATED FR MASTERBATCH

MB PET DETO 31 is a thermal stable masterbatch based on organic bromine compounds with an added synergist, developed for application in PET.
 MB PET DETO 31 with high bromine content and Antimony Trioxide is supported by a PET matrix to improve dispersion and homogeneity.
 MB PET DETO 31 shows a very high UV resistance and total absence of blooming effect.
 MB PET DETO 31 has a wide range of applications: Styrenics, polyolephinics and ETP.
 The percentage of dosage of MB PET DETO 31 depends on the polymer in which it is used.

PHYSICAL-CHEMICALS PROPERTIES

Appearance	White pellets
Melting Point, °C	min 260
Volatiles, %	max 0,3

HANDLING AND STORAGE: The processing and use of MB PET DETO 31 requires adequate technical and professional knowledge. Please consult safety data sheet for further handling, storage and toxicity information.

MB PET DETO 31 has to be stored in tightly sealed original container in a cool and well-ventilated area, away from direct sunlight.

PACKAGING: Standard pack size of MB PET DETO 31 is 25 Kg in plastic bags.

Important note Some plastic additives, fillers or pigments can influence significantly flame retardant properties of the end product. Before using these products, please be informed. Machine stop at high temperature could create degradation of polymers. Please clean with neutral polymers.
