

GC TRI PE 70

1,2-bis(2,4,6-tribromophenoxy)ethane

Chemical Formula $C_{14}H_8Br_6O_2$
Molecular Weight 688 g/mol
CAS Registry Number 37853-59-1

GC TRI PE 70 is a brominated flame retardant additive developed especially for HIPS, ABS, polycarbonate, thermoplastic, elastomers, unsaturated polyesters, adhesives, coating and textiles. The high melting temperature of GC TRI PE 70 allows production at high temperature. GC TRI PE 70 is easy to process and can improve flowability.

PHYSICO-CHEMICAL PROPERTIES

Appearance:	White powder
Bromine content, %	70
Volatiles, %	0.5 max
Melting Point, °C	220 min

HANDLING AND STORAGE: The processing and use of GC TRI PE 70 requires adequate technical and professional knowledge. Please consult safety data sheet for further handling, storage and toxicity information.

GC TRI PE 70 has to be stored in tightly sealed original container in a cool and well-ventilated area, away from direct sunlight.

PACKAGING: Standard pack size of GC TRI PE 70 is 25 Kg plastic bags.

Important note

Some plastic additives, fillers or pigments can influence significantly on flame retardant properties. Before to use the products, please be informed.

Stop machine with high temperature could create degradation of polymers. Please clean with neutral polymers.

NOTE:

Information contained in this document is provided to the best of our knowledge and is considered true as per revision date. We do not accept any liability for loss and damage that may occur from the improperly use of this information and for the use against the safety legal requirements and patent rights. This specification does not release the customer from the obligation to check the product as to its suitability for intended area of usage.
